

60001595778.txt

I watch RFD-TV on DirecTV and soon Dish Network.

We live so far out away from standard TV signals that we have to have satellite for our television service, and rely heavily upon RFD TV for our farm for its informative programs on animal care, new legislation, helps us comply with new regulation, and weather reports.

Please consider our need of this channel as an important source of information for rural farmers.

Thank you!

Timothy Woody
