Unclear on the proceeding number. See page 9 of DA-16-334 dated March 30, 2016. Denied request for M&C error waiver for Tri on City SD Application # 1008282. We had requested a waiver on the M&C deadline because we were unaware of an underestimated Internet access expenses until the service provider pointed out the fact, and by then the service was funded for FRN 2737224. Read details in appeal request to USAC and FCC (documentation in your files). It was a correctable error, but we were not aware that the error existed until the service provider informed us. The FCC has restructured the e-rate emphasis toward higher speed Internet, and this is the service requested, but is only one quarter funded due to this under-estimate (\$289/month vs. \$1000/month actual). As a result it is a significant financial impact on the school district. We are requesting that the FCC reconsider this denial and direct the SLD to fund the service at the full \$1000/month.
