Model (A-CAM) )

**COMMENTS  
OF  
NEWPORT TELEPHONE COMPANY, INC.**

The Newport Telephone Company, Inc. (NTC) (SAC 150107) hereby submits the following challenges to census blocks designated as competitively served in version 2.2 of the Alternative Connect America Fund Model (A-CAM).

In reviewing the A-CAM competitively served Census Blocks, June 2015 FCC 477 Data, the following blocks were identified in our service area:

<b>Census Block</b>	<b>FCC 477 Competitor (June 2015 Data)</b>
360430115011007	Time Warner Cable Inc (TWC)
360430115011013	Time Warner Cable Inc (TWC)

The two census blocks identified above appear as “competitively served”. NTC employees have confirmed via a field ride through these census blocks that no TWC facilities exist that would support service in either census block. NTC has also attempted to verify availability of service on the TWC website and received a message that “Your address may not be serviceable by Time Warner Cable.” It is for these reasons, we request the two census blocks identified above be designated as not being competitively served.

Respectfully Submitted,

Joseph A. Tomaino  
Vice President of Operations

Newport Telephone Company, Inc.
