COMMENTS OF  
shelley mckee  
April 21, 2016

The market for video content is booming and highly competitive – innovating around the existing set-top box rules that are widely regarded as a failure. The market is also rapidly evolving away from old-fashioned set-top boxes toward a wide variety of innovative applications and devices. Another round of slow-moving, heavy-handed government regulation would put a break on innovation, and benefit companies with political influence instead of companies who provide what consumers want. I urge you to reject the proposed rule.

Respectfully submitted,
