I'm under 1 mile as the crow flies from city hall in Sultan, WA. I'm a little over 2 miles by car. I have ONE internet provider who serves horrible DSL. I have no other options despite the FCC broadband maps that say I have great coverage. Comcast will not even give me a quote to run cable to my house but you show them covering me. I have no choice. Enforce net neutrality! Break the monopoly treatment Comcast is getting away with. They own a franchise and bribe the government and I am powerless to stop it. Comcast is too huge for a tiny town to fight and they've got a state law that prohibits towns from providing their own internet.

There is NO internet worth using in my house and I have 3 school-age kids. What the heck are you doing? Our country is horrible at internet and it's your fault. Before the 1996 agreement, we had great choices of lots of providers.
