Selective data caps fly in the face of the Net Neutrality rules your agency passed last year to protect an open Internet. The FCC should vigorously investigate and immediately stop these abusive practices by Internet Service Providers.

It's the FCC's responsibility to protect the public interest in a truly Open Internet and consumers from abuses by the ISPs upon which we depend.

Congress should urge the FCC in the strongest possible terms to do its job and prevent ISP violations of the spirit and letter of the Net Neutrality rules we worked so hard to see passed last year. Without implementation and enforcement public interest rules are meaningless.

Please do everything in your power to preserve our Open Internet.

Sincerely, - A.

Note: for privacy reasons, rather than providing my personal phone number, I'm providing the number of an advocacy group. If you'd like to contact me about my complaint, please do so via email.
