

RM-11769

Petition for rulemaking to eliminate exclusive CW sub bands

The intent of this proposed rule making is to allow more/different modes into sub bands that are exclusively Morse code. This is a BAD idea as it would create more congestion and interference into the Morse bands at a time when Morse Code is experiencing steady growth even though the Morse requirement has been eliminated from FCC licensing requirements. (IMHO BAD idea!)

Even now, at times, on contest weekends, the cw bands are often so crowded with Morse operations as to make it difficult to make/maintain Morse contacts. I cannot imagine the interference level if other modes are allowed to operate with the exclusive cw bands.

I am against the proposal to allow additional modes into the exclusive CW bands and I hope this proposal is soundly defeated.
