In regards to the petition RM-11769, I oppose this request to redesignate the CW portion of the subband as currently is established in the FCC Rules Part 97. I am an Extra class license holder with call sign KI6LDM. While I do not use the CW portion of the bands, I often do listen and see the tremendous value for having this mode and the need for the restriction for CW only. While many may say this is "old fashion", this legacy mode has proven to be very valuable especially when band conditions and/or propagation is poor. Furthermore, it has become even more popular even after the FCC has lifted the requirement for CW in the year 2000 as a requirement for obtaining an amateur license.
