Please stop all actions that either remove, suspend or limit the remaining amateur radio frequencies. We have been around since the dawn of radio communications. We have only been limited by ridiculous filings from commercial enterprises. We offer so much to communities especially in time of disaster. As antiquated as morse code communication may sound, it works when all other types of communication is unavailable. Remove these bands and you destroy and eliminate this useful , yes even today, means of communication for all times...

Sincerely,

Henry Zawadzki
