

60001842078.txt

This petitioner apparently doesn't understand that there are currently only two amateur radio frequency bands where all license classes are restricted to using CW only. These are the 6 Meter and 2 Meter bands.

On the HF bands, the portions where CW is normally used are already designated RTTY and DATA segments, and therefore are shared segments allowing for the use of all of the up-to-date computer generated digital modes except digital voice or image.

Although CW is allowed throughout all amateur frequency bands, the currently accepted gentlemen's agreement, or band plan, means in actual practice that those band segments designated RTTY and DATA are in fact the portions of the band where CW remains the primary mode of choice.

Because of the fact that only two bands have actual CW Only segments, and the fact that these segments are very narrow in comparison to the remainder of these two bands, this petition is totally unnecessary, and in fact would accomplish nothing that has not already been addressed in the rules.

If it ain't broke, don't fix it.
