Big Corporations and even Hospitals don't need to commercialize American Citizens private information. It's just abuse of our freedoms and can even put Americans in harms way. There needs to be enforceable Laws to hinder the importance of Non-Commercializing American Citizens Personal Information that absolutely no Corporation has a need or a legal authority to have about another American Citizen. unequivocally and with no exceptions! This is the LAW now but because of Agency's like the FCC they are not enforced. Do your Duty and enforce these existing LAWS to protect Americans from Identity Fraud and allowing Personal Information from getting into Criminal and Terrorists hands. There is no way Facebook and Google needs any of this Information whatsoever is there?
