The marketplace for video content is roaring and extremely competitive, offering a wide array of video streaming services, cloud-based video on demand, and apps providing news, films and programming. This market is quickly innovating beyond the traditional set-top box to new applications and devices with more diversity than ever. Past FCC attempts to regulate set-top boxes have been a complete failure. Yet another failed attempt at top-down government regulation will only stifle innovation and benefit companies with political influence rather than companies that provide what consumers want. We don't need the FCC to attempt to fix what isn't broken -- I urge you to reject the proposed rule.
