The marketplace for video content is thriving and extremely competitive, offering a vast array of video streaming services, cloud-based video on demand, and apps providing news, movies and programming. This market is swiftly innovating beyond the traditional set-top box to new applications and devices with more options than ever.

Past Commission attempts to govern set-top boxes have been a complete failure. Yet another failed attempt at one-size-fits-all government regulation will only hinder innovation and benefit companies with political power rather than companies that provide what Americans want. We don't need the federal government to repair something that isn't broken -- I urge you to reject the proposed rule.
