The market for video content is thriving and incredibly competitive, offering a diverse array of video streaming services, cloud-based video on demand, and apps providing news, films and programming. This market is swiftly innovating beyond the traditional set-top box to new applications and devices with more options than ever.

Past Commission attempts to control set-top boxes have been a complete failure. Yet another failed attempt at top-down government regulation will only stifle innovation and benefit companies with political sway rather than companies that provide what Americans want. We don't need the FCC to fix what isn't broken -- I urge you to reject the proposed rule.
