The exchange for video content is roaring and highly competitive, offering a vast array of video streaming services, cloud-based video on demand, and apps providing news, movies and programming. This market is swiftly innovating beyond the traditional set-top box to new applications and devices with more choices than ever.

Past Commission attempts to control set-top boxes have been a complete failure. Yet another failed attempt at heavy-handed government regulation will only stifle innovation and benefit companies with political sway rather than companies that provide what Americans want. We don't need the federal government to repair something what isn't broken -- I urge you to reject the proposed rule.
