The exchange for video content is thriving and extremely competitive, offering a wide array of video streaming services, cloud-based video on demand, and apps providing news, films and programming. This market is rapidly innovating beyond the traditional set-top box to new applications and devices with more options than ever.

Past Commission attempts to govern set-top boxes have been a complete failure. Yet another failed attempt at one-size-fits-all government regulation will only put the brakes on innovation and benefit companies with political influence rather than companies that provide what Americans want. We don't need the FCC to repair something that isn't broken -- I urge you to reject the proposed rule.
