The marketplace for video content is roaring and incredibly competitive, offering a diverse array of video streaming services, cloud-based video on demand, and apps providing news, films and programming. This market is swiftly innovating beyond the traditional set-top box to new applications and devices with more options than ever.

Past Commission attempts to control set-top boxes have been a complete failure. Yet another failed attempt at one-size-fits-all government regulation will only hinder innovation and benefit companies with political influence rather than companies that provide what viewers want. We don't need the government to fix what isn't broken -- I urge you to reject the proposed rule.
