The market for video content is booming and highly competitive, offering a vast array of video streaming services, cloud-based video on demand, and apps providing news, movies and programming. This market is swiftly innovating beyond the traditional set-top box to new applications and devices with more choices than ever. Past FCC attempts to govern set-top boxes have been a complete failure. Yet another failed attempt at top-down government regulation will only put the brakes on innovation and benefit companies with political sway rather than companies that provide what Americans want. We don't need the FCC to fix what isn't broken -- I urge you to reject the proposed rule.
