The marketplace for video content is roaring and extremely competitive, offering a wide array of video streaming services, cloud-based video on demand, and apps providing news, films and programming. This market is swiftly innovating beyond the traditional set-top box to new applications and devices with more options than ever.

Past government attempts to regulate set-top boxes have been a complete failure. Yet another failed attempt at top-down government regulation will only put the brakes on innovation and benefit companies with political sway rather than companies that provide what Americans want. We don't need the FCC to repair something what isn't broken -- I urge you to reject the proposed rule.
