The marketplace for video content is booming and incredibly competitive, offering a vast array of video streaming services, cloud-based video on demand, and apps providing news, movies and programming. This market is quickly innovating beyond the traditional set-top box to new applications and devices with more choices than ever.

Past Commission attempts to govern set-top boxes have been a complete failure. Yet another failed attempt at heavy-handed government regulation will only stifle innovation and benefit companies with political power rather than companies that provide what Americans want. We don't need the federal government to repair something that isn't broken -- I urge you to reject the proposed rule.
