The marketplace for video content is thriving and incredibly competitive, offering a wide array of video streaming services, cloud-based video on demand, and apps providing news, movies and programming. This market is quickly innovating beyond the traditional set-top box to new applications and devices with more diversity than ever. Past Commission attempts to control set-top boxes have been a complete failure. Yet another failed attempt at heavy-handed government regulation will only stifle innovation and benefit companies with political sway rather than companies that provide what viewers want. We don't need the FCC to fix what isn't broken -- I urge you to reject the proposed rule.
