The market for video content is roaring and highly competitive, offering a vast array of video streaming services, cloud-based video on demand, and apps providing news, films and programming. This market is quickly innovating beyond the traditional set-top box to new applications and devices with more options than ever.

Past FCC attempts to control set-top boxes have been a complete failure. Yet another failed attempt at top-down government regulation will only put the brakes on innovation and benefit companies with political power rather than companies that provide what Americans want. We don't need the FCC to attempt to fix what isn't broken -- I urge you to reject the proposed rule.
