The exchange for video content is booming and incredibly competitive, offering a wide array of video streaming services, cloud-based video on demand, and apps providing news, films and programming. This market is rapidly innovating beyond the traditional set-top box to new applications and devices with more options than ever.

Past Commission attempts to regulate set-top boxes have been a complete failure. Yet another failed attempt at top-down government regulation will only hinder innovation and benefit companies with political influence rather than companies that provide what Americans want. We don't need the government to repair something what isn't broken -- I urge you to reject the proposed rule.
