The marketplace for video content is booming and highly competitive, offering a vast array of video streaming services, cloud-based video on demand, and apps providing news, films and programming. This market is quickly innovating beyond the traditional set-top box to new applications and devices with more choices than ever.

Past Commission attempts to control set-top boxes have been a complete failure. Yet another failed attempt at one-size-fits-all government regulation will only put the brakes on innovation and benefit companies with political influence rather than companies that provide what Americans want. We don't need the federal government to fix what isn't broken -- I urge you to reject the proposed rule.
