The marketplace for video content is roaring and highly competitive, offering a diverse array of video streaming services, cloud-based video on demand, and apps providing news, films and programming. This market is rapidly innovating beyond the traditional set-top box to new applications and devices with more choices than ever.

Past Commission attempts to govern set-top boxes have been a complete failure. Yet another failed attempt at top-down government regulation will only stifle innovation and benefit companies with political influence rather than companies that provide what consumers want. We don't need the federal government to repair something what isn't broken -- I urge you to reject the proposed rule.
