The market for video content is booming and incredibly competitive, offering a vast array of video streaming services, cloud-based video on demand, and apps providing news, movies and programming. This market is rapidly innovating beyond the traditional set-top box to new applications and devices with more options than ever.

Past Commission attempts to control set-top boxes have been a complete failure. Yet another failed attempt at one-size-fits-all government regulation will only put the brakes on innovation and benefit companies with political power rather than companies that provide what Americans want. We don't need the federal government to attempt to fix what isn't broken -- I urge you to reject the proposed rule.
