The marketplace for video content is roaring and highly competitive, offering a diverse array of video streaming services, cloud-based video on demand, and apps providing news, films and programming. This market is swiftly innovating beyond the traditional set-top box to new applications and devices with more options than ever.

Past Commission attempts to control set-top boxes have been a complete failure. Yet another failed attempt at heavy-handed government regulation will only hinder innovation and benefit companies with political power rather than companies that provide what consumers want. We don't need the government to attempt to fix what isn't broken -- I urge you to reject the proposed rule.
