Please remember US citizens deserve a choice. Not only in elections, but I how we are forced to interpret the information we are given on a daily basis. Please do not allow independent programmers to be overlooked by huge conglomerate. Especially if they're in the habit of practicing " bad business ". That Charter is able to acquire anything at all with their track record- is a symbol of what is wrong- with my America. I ask that this acquisition be watched very closely.

Thank you-
Terry Gordon
