

60001999907.txt

To: Federal Communications Commission
Subject: Please deny RM-11708 and RM-11769

These rulings will have a detrimental effect on CW/RTTY operations. Allowing the wider bandwidth digital operation in the CW/RTTY subbands will cause significant interference in subbands that already can be crowded during contesting.

The wider band digital operations should be put in the SSB spectrum where there is ample room.

The FCC should rule against RM-11708 and RM-11769

Thank you.
