

60001999918.txt

I am opposed to RM-11769. I am licensed as an amateur radio operator since 1958 as well as an ex-commercial CW operator for 22 years. We need to maintain our spectrum for CW only. There is plenty of spectrum for digital modes as well as RTTY modes. This will be a start to eventually delete CW totally in the future. The new hams need clear frequencies to advance their proficiency.
Thank You
Richard Singer/K6KSG
