The discontinuance of Millry Communications’ offering of broadband Internet access transmission service under tariff, and the continued provision of such service on a detariffed basis, will apply to the entirety of the Company’s study area. This includes the following exchanges: Millry

Millry Communications currently has only one customer for its broadband Internet access transmission service. That customer is the Company’s own non-regulated Internet service provider (ISP) affiliate. The Company’s affiliated ISP purchases broadband Internet access transmission service for use as an input for the broadband Internet access services it offers to residential and business end-user customers. The discontinuance of the tariffed offering of broadband Internet access transmission service will have no effect on the end-user services provided by the Company’s affiliated ISP.

On May 2, 2016, Millry Communications furnished its affiliated ISP with the attached memorandum, which notifies the ISP of the Company's plan to discontinue its provisioning of broadband Internet access transmission service under tariff and to continue providing such service on a detariffed basis.
