RE: **Protest against** FCC RM-11769 - Petition to eliminate "exclusive" existing CW allocation from all the "exclusive" bands now in use.

Dear Sirs:

I would like to submit a protest **against the FCC RM-11769** petition to eliminate "exclusive" existing CW allocation from all the "exclusive" bands now in use.

The addition of other modes, especially digital modes or any mode except extremely narrow bandwidth operation, would not fit into the "co-operative use" in the low end CW allocations of especially 160 thru 10 meter range where weak signal operations primarily take place.

Some of the oldest type of radio communication equipment we now use for simple CW transmission will be eliminated from future amateur spectrum now in use.

If it is passed, I fear that CW, the oldest type of amateur operation communication technique known, will be eliminated from future operations. There are hundreds of thousands of amateurs in the US and world-wide who continue to enjoy this mode of operation!

Please leave the frequency allocations to stand as they are, without modification. If it's not broken, don't fix it!

Respectfully submitted,

Stephen Miller
