Washington, DC 20554

Subject: Comment Regarding Proceeding Number RM-11769 Petition for Rulemaking
eliminating Exclusive CW Subbands (11)

Commissioners:

I would like to register my opposition to RM-11769 and request that it be denied.

It appears that the petitioner does not like CW and basically wants to do a "land (spectrum) grab" for modes that he only prefers.

CW is not a defunct, ancient or obsolete communication mode. It is alive and well. It is currently harmonized with other appropriate modes that work reasonably well. The proposal in RM-11769 would likely cause an increase in QRM and would not be beneficial to anyone.

I urge the Commission to keep the current rules/spectrum assignments as they are and deny the approval of RM-11769.

Thank you for your consideration

John D'Errico
