I am really tired of receiving robocalls that are directed to people other than myself. I do not owe money, yet I keep getting calls from robots demanding that I return their call. They name the person they are trying to reach, and it is not me, or anyone in my family. There is no way to get them to stop calling, I followed their directions to talk to a human, I explained, but they did not stop calling. In any case, I do not want robocalls of any kind on any phone that I have. Please fix this.
