

60002082024.txt

My telephone rings as often as 4 times per day with unwanted, unsolicited and certainly unwelcome automatically-dialed calls with either a pre-recorded message or some unknown person using a bogus or hidden telephone number urgently desiring to sell something. It is beyond maddening this practice is allowed to go on. Please please, for the sake of the sane, end this violation definitively so we all can get on with our lives. Everyone should have access to a simple method of permanently thwarting robocalls in 2016.

Thank you for your kind and prompt attention.
