I have received at least 15-20 calls a week on my cell phone from solar companies (I don't qualify for this). Also get hang up calls from "unknown" callers, miscellaneous calls who don't say who they are or from where they are calling, and when I request they remove my number from their list, tell me that they don't have a list. The other hang-up calls only give a city (usually somewhere else in the United States) and should not even be calling California residents. When I tried to call back one of these number, I got a recording that it was no longer in service - amazing how a number not in service can call me!

I have had my cell phone number on the do not call list for several years, but it does not seem to stop these irritating calls.
