I am receiving more robo calls now than ever despite the fact that I am on the DO NOT CALL LIST, the newest tactic is computer generated coice that speaks to you and you andwer questions and it ask you additional questions If I was interested I would call them. Im not interested in a free alarm system, nor donating to pro life organzations, I also get the microsoft call and the irs calls several times a week, enough is enough fix the system. What is the point in habing a do not call list if it means notjing and there are no consequences for breaking the law.
