They call and call and I don't pick up. then I try to see on caller ID to find out who they are and number is not recorded. If I am fast and pick up, it's a dial tone but the call is on my caller ID. They say they are conducting a survey and will call you back but if you pick it up they are not on the other end. They say they don't fall under the "do not call list" rules also!
