Please put a stop to this unnecessary aggravation that is being forced on the people of this country. We do have the DO Not Call list which the telemarketers started ignoring a few years ago. They are arrogantly thumbing their noses at the government's rules already. I have received calls at 6:00 AM and it is not necessary. I have decided that I will be voting against any legislator that does not take an active role in putting some teeth back into legislation that will finally put a stop to this type of unsolicited contact and intrusion of our privacy.
