All my phones are on the do not call registry. It doesn't matter...now the calls are coming to my cell phone. I am so tired of having my life's activities interrupted by the sound of a phone ringing that I'd never pick up!!! Tighter control of commercial speech are necessary, not to mention the tactics of bill collectors. They should not be allowed to use the phone as their avenue for intimidation. Make them stick to the US mail and the courts. And no exemptions for so called charities.
