Please, please stop robo calls--business and political solicitations. They are deceptive (use my local area codes to disguise themselves), offer no value to the receiver, and are a flat-out nuisance. I get as many as four calls a day, seven days a week. Further, calls or texts to my cell phone are those that I could end up paying for--actually making ME pay for a call I didn't solicit and don't want. Robo calls invade my privacy. Currently there's no recourse on my part. Please, FCC do your job on behalf of all American citizens who ask that robo calls stop. Now.
