Robo Calls are nothing but a HOME INVASION...intruding into a persons personal space and serenity! The phone has always been amazing, connecting us to friends and family...but has turned into something we dislike, attempt to block from the intrusive unwanted calls present. Be ill and try to get some rest and expect/receive 6-8 calls per day...with family always in our thoughts, we hate to ignore a call...and when they come...not friends/family but solicitations and unwanted harrassment, which is what these calls are! Intrusion/infuriating/maddening/nothing but endless harrassment. Restore peace, I beg you!
