RE: Ligado Modification Applications

Docket No. 11-109
Docket No. 12-340

To Whom It May Concern:

AGCO Corporation wishes to file a response to the comments filed by NovAtel Inc. (“NovAtel”) through its counsel by letter dated May 19, 2016.

AGCO supports the comments made by NovAtel in response to Ligado Network LLC’s proposed new applications to modify the ancillary terrestrial component of its L-band Mobile Satellite Service Networks. AGCO requires high accuracy positioning in its applications for farmers and growers using GPS receivers and we share NovAtel’s concern with the conclusion in the Robertson & Associates study that suggests there is no meaningful correlation between a 1-dB change in GPS performance.

We support NovAtel’s position and the technical points that they raise.

Yours truly,

AGCO Corporation
