Please do not allow robo calls to cell phones. For the the last 3 years I have been getting both person to person and robo calls to my cellphone which are of the illegal type (I checked the exact type allowed.) I reported these to the DO not Call system and they do not let up. I have no past due debts (always pay within 30 days).

As I understand it, the FCC is considering allowing robo calls for defaulted student loans to be made to parents (who are not responsible). Our son has enough money to pay yet will not. This is his issue (along with other issues) Robo calls of this nature will cause a huge public outcry, one the FCC will have to answer to. I request you add more effective ways to punish the wrongful ways I am being robo called right now. It is time to make these type of calls be fined \$10K first offence, \$100K 2nd, 1 Million 3rd and so on. Then let all the people be able to use a class action suit to make these violators pay. I still get the "Expired auto warranty" telemarketing calls and I have never contacted these people about their products and I have a factory lifetime warranty, so they do not have their facts correct and just assuming. . Also If you do decide to make changes, at least include: Debt collection robocallers must notify us of our right to stop receiving calls; The number of allowed calls or texts should be limited to no more than three per month, and only to those who directly hold federal debt - not friends and family The guidelines should be clear and readily available
