Re: *Ex Parte* Notice: *Terrestrial Use of the 2473-2495 MHz Band for Low-Power Mobile Broadband Networks* – IB Docket No. 13-213

Dear Ms. Dortch:

On June 9, 2016, Jay Monroe, Chairman of the Board of Directors and Chief Executive Officer of Globalstar, Inc. (“Globalstar”), L. Barbee Ponder IV, General Counsel & Vice President, Regulatory Affairs, for Globalstar, Tim Taylor, Vice President of Finance, Business Operations & Strategy, for Globalstar, Steve Berman of Lawler, Metzger, Keeney & Logan, LLC, and I met with Commissioner Mignon Clyburn, Daudeline Meme, Legal Advisor to Commissioner Clyburn, and David Nayer, Commissioner Clyburn’s legal intern, regarding the Commission’s proposed rules in the above-captioned proceeding.¹ On the same day, Globalstar’s representatives met with Edward “Smitty” Smith, Legal Advisor to Chairman Tom Wheeler, regarding this proceeding. In addition, on June 9 and June 10, 2016, I spoke by telephone with Mr. Smith concerning the Commission’s proposed rules.

During these meetings and on these calls, we pointed out that this proceeding is about whether the Commission will take steps to advance near term broadband deployment, encourage investment and innovation, and spur more intensive use of spectrum. Specifically, we urged the Commission to adopt rules in this proceeding to permit a new, competitive offering, Terrestrial Low Power Service (“TLPS”). The Commission’s proposed rules strike a reasonable balance and serve the public interest by adding 22 megahertz to the nation’s broadband spectrum inventory and encouraging innovation and investment, while ensuring that neither licensed nor unlicensed services are disrupted.
