Dear Ms. Dortch,

CTIA is pleased to file into the record for the above-captioned proceedings the informational video linked below, which highlights the importance of seizing the current opportunity to make available critical high-band spectrum for tomorrow's 5G innovations. As CTIA reiterated to the Commission previously, action this summer to create technical and licensing rules for the 28, 37, 39, and 64-71 GHz bands will stimulate the next generation of wireless in the U.S. by encouraging investment and fostering innovation in these bands.
