

Please

adopt the ARRL proposed licensing re-structuring plan. This plan is basically agreed upon by most hams and provides the FCC with stream-lining.

Many ARES/RACES members I know will benefit from this, and hence will be more likely to continue their emergency communications efforts that are of prime benefit to local authorities, efforts that the FCC can take credit for maintaining. Also, this will allow us much improved inticements for interesting the public enough to attend licensing classes. Thank You.
