

I am a radio amateur; N9ZQS. =

I am also a member of the A.R.R.L.

1. I support the A.R.R.L. proposal for simplified amateur =

license structure.

2. Morse code is needed to bridge the language barrier between countries and to provide a simple / inexpensive common mode in which to communicate. 10 words per minute should be the maximum required code speed for any license.

Foreign goodwill is an important part of this hobby.

3. License testing should include the additional subjects of =

public service, first aid, and general and emergency =

procedures. Public service and emergency assistance =

is something the amateur radio hobby can give back =

to the community. We should know how to do it.

Thank You

James Oberg
