

I believe that manual transmission and reception of Telegraphy is an anacronism - similar to a sliderule. Engineering schools no longer teach operation of a slide rule as it is irrelevant in today's scientific environment.

-

I propose that the FCC reduce the code requirement to 5 WPM for all classes of amateur license.

-

I also believe the written test should NOT be available for memorization. Furthermore, I believe the advanced and extra class licensees should demonstrate knowledge of advanced communication theory (including the interaction of data structures and modulation formats)

-

end of comment.
