

I believe that manual transmission and reception of Telegraphy is an anacronism - similar to a sliderule. Engineering schools no longer teach operation of a slide rule as it is irrelevant in today's scientific environment.

-

I propose that the FCC reduce the code requirement to 5 WPM for all classes of amateur license that provide HF access.

-

I also believe the written test should NOT be available for memorization. Furthermore, It is my belief that advanced and extra class licensees should demonstrate knowledge of advanced communication theory (including the interaction of data structures with modulation formats)

-

end of comment.
